Information Systems student with hands-on experience in the software development lifecycle, system analysis, and quality assurance. Proven track record in defining functional requirements and user workflows for AI-powered conversational platforms, alongside designing and executing rigorous testing strategies, including automated integration tests and end-to-end user flow simulation tests with over 700 unit tests for complex web applications. Skilled in manual and functional testing, documenting test cases, and collaborating with cross-functional teams to bridge the gap between business needs and technical execution. Detail-oriented, analytical, and highly committed to ensuring software quality and successful user acceptance testing.

Work Experiences

PT. Vektor Inti Prasada - Jakarta, Indonesia (Remote) Nov 2025 - Jan 2026

Frontend Developer

- Developed the responsive landing page and company profile user interfaces using React, TypeScript, and Tailwind CSS, converting design mockups into interactive and reusable UI components.
- Conducted cross-browser and mobile responsiveness testing to ensure layouts, navigations, and typography rendered perfectly across all screen sizes.
- Collaborated closely with the lead developer to integrate the frontend components and assets into the Laravel framework, ensuring a smooth system integration.
- Optimized page performance by auditing frontend assets, refining CSS structures, and ensuring fast initial loading speeds for enhanced user experience.

Hyperion – Esports Team Operating System - Remote May 2026 – Present

Full-Stack Software Engineer

- Designed and built the entire system architecture of a multi-role Esports Operating System (Team OS) from scratch, featuring dynamic dashboards, financial tracking, and real-time announcement modules.
- Implemented secure database schemas, Row-Level Security (RLS) policies, and custom JWT authentication claims in Supabase to guard role-based permissions.
- Developed a robust automated testing infrastructure from the ground up, authoring 770+ unit tests and Playwright End-to-End (E2E) test cases to validate multi-user workflow scenarios.
- Integrated external APIs for automated WhatsApp notifications and set up pre-commit CI/CD gates (linting, typechecking, and test coverage thresholds) to ensure high code quality.

Education

STMIK Tazkia - Bogor, Indonesia 2024 - Present

Bachelor of Information Systems, 3.94/4.00

Academic Project

Sapa Tazkia Chatbot AI - Universitas Tazkia

Full-Stack Software Engineer Oct 2025 - Present

- Developed a Retrieval-Augmented Generation (RAG) backend utilizing Express.js, Qdrant Vector Database, and OpenAI API to deliver accurate, context-aware responses to academic and campus inquiries.
- Built an interactive React.js & Tailwind CSS frontend integrated with a MySQL database via Prisma ORM, enabling students to access real-time academic summaries (GPA, grades) and download automated PDF transcripts.
- Designed and implemented a robust automated testing infrastructure, authoring backend unit/integration tests using Jest and Supertest, alongside End-to-End (E2E) user journey testing with Playwright to ensure zero-regression deployments.
- Implemented secure JWT and Google OAuth authentication, established multi-tier rate limiting using Redis, and containerized the entire multi-service application (MySQL, Redis, Qdrant) using Docker Compose.

Organizational Experience

Badan Eksekutif Mahasiswa STMIK Tazkia (BEM) - Bogor, Indonesia Dec 2024 - Dec 2025

Creative Media Staff (Komdigi)

- Designed high-quality digital posters and publication materials for various BEM events, collaborating with cross-functional event committees to translate design briefs into visual assets.

Additional

- **Soft Skills:** Effective Communication, Leadership, Teamwork, Public Speaking, Critical Thinking, Analytical Thinking, Time Management, Problem Solving, Adaptability, Networking, Team Coordination
- **Technical Skills:** API Testing (Postman, Supertest), Application Architecture (Monolithic, Microservices, Retrieval-Augmented Generation/RAG), Cloud Infrastructure (Google Cloud, AWS, Tencent, Azure), Containerization & DevOps (Kubernetes, Docker Swarm, Docker Compose, GitHub Actions), Database & Caching (SQL, PostgreSQL, MongoDB, MySQL, Redis, Qdrant Vector Database), Development Tools (Visual Studio Code, Prisma ORM, Git), Programming (Python, Flutter, JavaScript/Node.js/React.js, TypeScript, Tailwind CSS), SDLC (Agile Scrum, Agile Kanban, Waterfall), SDLC Documentation (Project Charter, BRD, FRD, TSD, UAT), UAT Method Test (Manual & Automatic, Jest, Playwright, Vitest)
- **Knowledge:** COBIT 2019, ISO 27034 Application Security, ISO 27001 Information Security Management System, OWASP, JWT Security & OAuth 2.0
- **Language:** Indonesian: Fluent (Written & Spoken), English: Intermediate (Written & Spoken)
